

Logística da Prevenção e Combate a Fogos Florestais - A Mobilização de Recursos

Portugal

Organización de gestión de [INSTITUTO DE ESTUDOS DE LOGÍSTICA E GESTÃO GLOBAL - IN OUT GLOBAL](#)
la AD:

Otros socios nacionales: [INDEG/ISCTE Instituto para o Desenvolvimento da Gestão Empresarial do ISCTE LUSITÂNIA - AGÊNCIA DE DESENVOLVIMENTO REGIONAL](#)

Tema EQUAL: Espíritu de empresa - Creación de empresas

Tipo de AD: Geográfica - Zona rural - CENTRO (P)

Personalidad jurídica de la AD: Asociación sin personalidad jurídica

Identificación de la AD: PT-2004-167

Situación administrativa Aprobado para la acción 2

Fecha de selección: 12-09-2005

Última puesta al día: 19-10-2005

Monitoring: [2005](#)

Razones

- Deep knowledge of the delimited territory by the project and of its different actors;
 - Absolute knowledge of the information and communication technologies already implemented, in the forest prevention information system field, possessing the possibility to adapt algorithms to the new logistic processes;
 - To clarify/to complement strategies of the forest fire combat;
 - To develop global level planning systems;
 - Optimization process of the logistic operations to include;
 - Security and emergency net integrated system optimization process;
 - Learning process with new realities and experiences in different geographical fields. ,
 - Inexistence of large complexity formal processes in the forest fires combat and support to combat;
 - Inexistence of reference boards conducting to the citizens effective protection ;
 - Inefficient alert managing system;
 - Deficient quality of the forest fires support to combat processes;
 - Large operation costs.
 - Great levels of population illiteracy;
 - Accentuated unbalance in the regional development processes;
 - Accentuated desertification process of the rural areas;
 - Accentuated aging process of the characterizing population of the target territory.

Objetivo

The great fires that, in the summer of 2003 had cultivated for all of the country, they had provoked enormous damages and the feeling of unreliability and desperation in the resident populations that, without resources or capacity of reaction, had attended impotent to all the destruction. Since then, the number of deaths in result of forest fires ascended to more than thirty victims. The Portuguese situation in what replies to forest fire theme, have been the one of real split off between the promoted actions to the forest protection against fires and the citizens safety actuation, that integer the participation of the population who is typically more affected. This project, it comes from the increasing needs to associate the Portuguese forest protection to the safety of the population, in face of the real calamity that forest fires are. Its objectives are to systematize the needing knowledge of the forest fires prevention, support to combat and combat practices, to produce objects and tools that leads to a bigger autonomy, actualization and creation of needing professional skills in the forest protection process and promotion of

the needing platform to the training process, reinsertion and employment, supported by a skills net and high complementary knowledge. This project is oriented to the local government, public and/or private entities with intervention in local/regional development and/or with forest area activity, as long as to the representative entities of the militarized and security forces, young unemployed people / long duration unemployed people, women and general population. Its products include project description - workflow guide (processes chain), products that comes from the transnational activity, (as area experts data base, project area technical terms digital trilingual glossary, technical papers/best practices orientations and short papers editions from seminars to realize and transnational learning experiences), training manuals, motivate actions leaflet, papers derived from transnational learning experiences with the practices adapted to the Portuguese reality and articles about the project theme wrote by project team elements.

Innovación
